Questions

Should "client home" and "feed" be separate or integrated experiences?

How will clients know what their daily tasks are and how to complete them? What if they don't engage?

What if the "feed" becomes stale? Who and how should we engage to refine home search changes?

How will the existing products function alongside the client home?

What does the favorite home refinement process look like?

How do we inform what are the most important tasks to be done?

How much time and effort can we reasonably expect clients to spend in the app, given their busy schedules and the fast-moving market?
