UX/Product Designer

Confident and creative UX/Product Designer with 10+ years in aligning business goals with user needs through user research, data-driven analysis, and thoughtful strategic design implementation. Passionate about integrating consumer psychology and inclusive design to deliver impactful, user-centered products and services. Known for excellent leadership, collaboration, and project management skills that ensure timely, on-budget results.

Hilton

Lead Product Designer
Senior Product Designer

Denver, Colorado
Oct. 2023 – Jul. 2025
Aug. 2023 – Oct. 2023

- Increase efficiencies for managing hotel operations through bulk processing, saving over 1600 hours of work and generating \$120,000 in cost savings in 2024 and growing.
- Increase the number of programs/products from two to eight and optimize existing add-ons and premium room utilization products.
- Increase capabilities and number of hotels managing day-to-day work from 1,950 to 4,000.
- Lead, develop and strategize Prodigy's expanding ecosystem, optimizing user experience with business needs, streamlining information architecture, and supporting sustainable product growth in an agile environment.
- Manage, mentor and lead a junior UX designer on Prodigy projects, providing guidance on design execution, ensure alignment with project goals are met, maintain design consistency, and support skill development through regular feedback and collaboration.

VF Corporation

Senior User Experience Designer

Denver, Colorado
Jul. 2022 – Aug. 2023

- Lead and strategize migration and upgrade of VF brand's design system from Sketch to Figma, enhancing workflow efficiency, and boosting design productivity across multiple brands including Vans, The North Face, Timberland, Smartwool, Altra and Canvas.
- Increase overall communication by aligning best practices and consistency across all VF teams' design systems.
- Strategize with manager and leadership on the design tool migration, Storybook implementation, and new processes and procedures to increase collaboration and efficiencies across the organization.
- Mentor junior ux designers, providing guidance on design execution, Figma tool training, and skill development through regular feedback and collaboration at VF Corporation.

Compass Real Estate

Senior Product Designer

Denver, Colorado
Aug. 2021 – Jul. 2022

- Design a new client experience for iOS, Android, and responsive web that revolutionize how clients and agents collaborate on the home search process.
- Increase collaborative engagement between client(s) and agent by 20% and increase on platform communication by 10% through a new, innovative client home dashboard and feed experience.
- Increase payment plan adoption by 11%, recovering around \$2K/month in past-due invoices from a \$7M outstanding balance.
- Participate and lead design meetings with product owners, stakeholders, and upper management to gather requirements for assigned projects, present finished design, conduct design sessions, and gather feedback.
- Leverage qualitative and quantitative data to inform design decisions and effectively articulate a strategic vision for complex, scalable solutions.

Rhone, LLC

Senior User Experience Designer

Denver, Colorado
Oct. 2020 – Aug. 2021

- Lead, develop, and strategize Rhone.com by optimizing critical user flows and experiences through collaboration between product and development, leveraging UCD methodologies and qualitative data, ux best practices and aligning business goals with user needs.
- Build new ux documentation and processes from the ground up to better collaborate and communicate across multiple teams in an agile, start-up environment.
- Create a low-budget research program to engage Rhone customers to drive positive impact.

Cabela's / BassPro

User Experience Designer

Denver, Colorado
Oct. 2019 – Oct. 2020

- Optimize account creation and cart/checkout experiences on Cabela's & BassPro by conducting user research, creating prototypes, wireframes, high fidelity mocks and finished designs for native iOS, Android, and responsive web in an Agile environment.
- Work with development and stakeholders to refine and upgrade the iOS & Android apps and design system.
- Mentor two junior ux designers, providing guidance on design execution, how to communicate cross-functionally, ensure alignment with project goals are met, maintain design consistency, and support skill development through regular feedback and collaboration at Cabela's/BassPro.

HomeAdvisor (Angie's List)

User Experience Designer

Denver, Colorado
Sep. 2018 – Sep. 2019

- Lead and develop the Gig Economy and External Partnerships team (Handy, Nextdoor and Porch), launching a new marketplace to increase visibility for fixed-price tasks and educational content, effectively funneling users from HomeAdvisor's core platform and driving a 20% year-over-year increase in gig economy revenue.

- Support stakeholders and development teams on partnership integrations on HomeAdvisor's business initiatives with customer focus through data, user research, product strategy and design for web, tablet and native iOS and Android devices.
- Work with development leads to create a design system with a consistent, modular, front-end approach to web and app development at HomeAdvisor.
- Manage and lead a junior ux designer for projects on the Gig Economy & External Partnerships team, providing guidance on design execution, how to communicate cross-functionally, ensure alignment with project goals are met, maintain design consistency, and support skill development through regular feedback and collaboration at HomeAdvisor.

Arrow Electronics

User Experience Designer

Denver, Colorado
Feb. 2016 – Sep. 2018

- Increase ~5000% revenue growth at Arrow, scaling from ~\$40K to \$2M/month, and increased AOV by 300% (from ~\$100 to \$330) through purchase path optimization on the product detail page and cart/checkout flows.
- Reduce time on product detail page from 3min to 1min, increase product data engagement by 30%, and decrease chat/call support by 40% through improved layout and added supportive documentation to boost consumer confidence.
- Lead and strategize Product Detail Page & Cart/Checkout teams on Arrow.com by conducting research, creating prototypes, wireframes, leveraging qualitative & quantitative data to strategically drive design decisions, collaborating with product and development teams, and final design comps for responsive web, tablet, and mobile in an agile, start-up environment.
- Work with ux manager, product owners, and business analysts to devise a new streamlined process integrating ux design into development's agile process.
- Support stakeholders, development teams, and third-party contractors on Arrow.com's scale projects to align business initiatives with customer focus through user experience strategy, research, and designs.
- Work with design and development teams to create a scalable design system.
